

KiloDrive

BUILT IN JAMAICA. BUILT FOR YOUR BUSINESS.

RENTAL PARTNER PROPOSAL

Your fleet. More opportunity. Better control.

A more professional rental experience, from the first search to the final return.

For rental agency owners, directors and operations leaders in Jamaica.

6 MONTHS FREE

Gold plan. Unrestricted core rental usage.
A sponsored partnership offer for your agency.

Actual app screen with demonstration data.

More than a listing. A complete rental relationship.

Discovery / Eligibility / Checkout / Handover / Return / Records

THE INVITATION

Keep control of your business. Make every rental easier.

A six-month opportunity to assess KiloDrive with your own fleet, staff and customers.

Dear Rental Agency Owner and Management Team,

We invite your agency to join KiloDrive, a Jamaica-born transportation marketplace that brings vehicle rentals, ride hailing and courier services into one customer app. For a rental business, the value goes beyond being found: the booking, customer requirements, payment record, inspection and return can stay connected.

Your agency remains responsible for its vehicles, prices, rental terms and service standards. KiloDrive provides the digital tools to present those choices clearly, coordinate your people and retain a useful record of the transaction.

- **Reach customers where they already plan to move.**

Make your approved rental inventory discoverable to customers using the wider KiloDrive app.

- **Turn scattered administration into an ordered workflow.**

Give bookings, documents, payments, custody and follow-up a shared operational context.

- **Build confidence before handing over the keys.**

Explain requirements and policies early, then record the actual condition and agreement at collection and return.

Our offer: six months of complimentary Gold access with unrestricted core rental usage, activated for your agency under the partnership terms on page 15.

LOCAL BY DESIGN

Jamaican roots. A wider transportation audience.

Designed around local operations, with an app footprint spanning seven supported countries.

Jamaican operations

JMD rental quotes and financial records, parish-aware branch addresses, local branch schedules and a Jamaica operating context.

Your rental rules

Reusable requirements and policy profiles help reflect the agency's fleet, insurance permissions, deposits, age/licence requirements and permitted vehicle use.

Real local logistics

Branch locations, collection/return hours, maintenance blocks and disclosed pickup or delivery options support the way your business actually operates.

Visitors and residents

Present the same clear vehicle, price and requirement information to local customers, returning Jamaicans and international visitors.

One connected app. Seven supported countries.

JM Jamaica**BB** Barbados**BM** Bermuda**CA** Canada**KY** Cayman Islands**TT** Trinidad and Tobago**US** United States

Country coverage is not a claim of a measured customer count or guaranteed demand. A Jamaican listing serves its approved location; overseas app access does not imply cross-border vehicle permission.

THE CUSTOMER JOURNEY

From download to a rental account.

Customers do not need a paid provider membership to browse and request a rental.

**ANDROID**

**Search Google Play
for KiloDrive.**

[Open Google Play listing](#)

IPHONE / iOS

**Search the Apple App Store
for KiloDrive.**

[Check current iOS availability](#)

- 1 Choose the customer journey**
Select Jamaica for the local service journey and choose the customer option. Existing users can sign in.
- 2 Create and confirm an account**
Register with a supported social sign-in or enter the requested details. Complete email/contact confirmation and accept the applicable terms.
- 3 Make rentals easy to return to**
Choose Rentals as the preferred customer startup screen if desired. Enable useful booking notifications; allow location only when needed.
- 4 Complete the relevant rental checks**
Use My Account for identity and driving-licence evidence. The selected vehicle's requirements still apply; a passport alone does not establish permission to drive.

Google Play listing checked on 23 October 2026. iOS is included as a download option, but public Apple listing availability was not confirmed; prospects should check with KiloDrive if it is not shown.

CUSTOMER DISCOVERY

Help customers find the right vehicle.

Your agency can be discovered through the rental marketplace, not just a name in a contact list.

Actual rental catalogue. Demonstration vehicles and prices.

- Search around the rental they need.**
 Customers choose pickup and return dates/times, then use search, sorting and filters.
- Compare vehicles and agencies.**
 The catalogue shows the vehicle, rental company, daily price and seats. Branch maps provide location context.
- Inspect the details before requesting.**
 Open the gallery, specification, policies and qualification panel. Review the complete quote and available pickup/delivery choice.
- Request a booking or reserve ahead.**
 Use the available booking mode, meet its requirements and follow the confirmed status. A request is not a guaranteed reservation.
- Keep a useful connection.**
 Favorites, booking history, receipts and support make it easier to return to a familiar agency.

AIRPORT VISITORS AND TOURISM

Welcome visitors before they land.

A clearer pre-arrival experience can help your team spend less time explaining the same basics at collection.

Actual Jamaica branch map. It shows branch locations, not live renter tracking.

- **Plan before travel.**

A visitor can compare vehicle options, dates, local prices and requirements before arriving in Jamaica.

- **Choose a practical meeting point.**

Publish your real branch address, opening hours and contact information. Offer airport, hotel or other delivery only where your listing and operations support it.

- **Reduce surprises at the counter.**

Show deposits, mileage/fuel rules, extra-driver requirements and licence evidence before the customer commits.

- **Protect the return journey.**

Agree the return branch and time, inspect the vehicle and explain deposit resolution. This is especially useful when a customer has a flight to catch.

Airport collection, where offered

Sangster (MBJ) and Norman Manley (KIN) can be practical demand areas for participating agencies. No airport concession, shuttle or terminal delivery is implied.

FLEET AND POLICY MANAGEMENT

Set the rule once. Apply it consistently.

Reusable profiles help you run a coherent rental business across vehicles and branches.

Actual policy-profile screen. Draft templates require agency review and publication.

- Present a professional fleet.**
 Maintain make/model/year, seats, transmission, steering position, vehicle images, condition and branch assignment.
- Use policy profiles.**
 Build Standard Rental, Premium SUV or Long-Term Rental rules, then assign them to the relevant vehicles.
- Control the rental terms.**
 Define minimum/maximum duration, cancellation, no-show, early/late return, deposits, additional drivers, travel and permitted use.
- Keep availability realistic.**
 Confirmed allocations, reservations and maintenance blocks protect occupied periods. Extensions must pass fresh availability checks.
- Explain exceptions in advance.**
 Document breakdown, replacement, damage, accessories and dispute treatment. Existing bookings keep their accepted policy evidence.

CUSTOMER CONFIDENCE

Show who can rent, and what they need to resolve.

Clear qualification helps reduce avoidable requests and difficult collection-day conversations.

Actual eligibility panel. This synthetic example meets its displayed requirements.

- Use a reusable requirement profile.**
 Set the supported requirements for a vehicle: verified driving-licence evidence, a profile photo, minimum age and licence-holding period.
- Show the customer their standing.**
 The vehicle screen pairs each requirement with the customer's current status, instead of hiding the reason behind a disabled action.
- Reuse verified evidence.**
 Existing approved identity and qualification records can be used where applicable, reducing duplicate document requests.
- Check the actual rental period.**
 Final eligibility considers the vehicle and dates, including relevant document expiry. An approved passport does not verify driving entitlement.
- Keep control with the agency.**
 Verification supports a decision; it does not replace your insurance conditions, lawful policies or physical identity check at handover.

PEOPLE AND PERMISSIONS

One agency. Individual logins. Clear responsibilities.

Give your team access to the work they need without sharing the owner's account.

Actual rental provider dashboard. Team access is configured separately.

An operating model for your team

Illustrative assignments, mapped to the permissions available in your organization.

Owner / manager Maintain agency settings, invite staff and review effective access.

Reservations Review incoming bookings, customer requirements and availability.

Fleet / handover Maintain vehicle condition and record collection and return evidence.

Finance Reconcile permitted payments, receipts, refunds and reports.

Invite by email, choose permitted roles and branch scope, then require the person to accept with their own account. Revoke access when duties change or a person leaves.

An organization can delegate work. Staff access does not confer every financial permission, transfer ownership or approve a person's legal readiness.

CHECKOUT AND MONEY

Keep payment flexible. Keep the record precise.

Use the supported KiloDrive wallet flow or record payments received directly by your agency.

KILODRIVE WALLET

A recorded in-app payment

An eligible customer can use available wallet funds where offered. Payment and refund actions produce traceable financial records; availability and the current booking still control fulfilment.

PAID DIRECTLY TO YOUR AGENCY

Your payment. A connected record.

Receive an agreed cash, bank or other external payment through your own arrangements. Report the amount and supporting evidence in KiloDrive and use the authorized review flow. Recording proof does not itself move money.

Confirmation customers can keep

Booking acknowledgements, confirmed payment receipts and retained documents can be accessed from the booking; issued receipts can also be emailed and downloaded again.

Actual itemised quote. The shown price and deposit are demonstration values.

Payment processing, transfers, taxes and third-party charges are distinct from the complimentary Gold membership. Wallet funding methods depend on current availability.

COLLECTION AND HANDOVER

Before the keys change hands, agree what is being handed over.

Structured inspection and two-party acknowledgement give both sides a clearer starting point.

Inspect together

Photographs, existing damage, odometer, fuel/charge, tyres, keys and accessories create the collection record.

Acknowledge and retain

Both parties review and sign where required. Keep the completed agreement and inspection record available to download.

RETURN AND SETTLEMENT

Close the rental properly. Give the customer a clear ending.

A returned vehicle and a resolved deposit are separate milestones. KiloDrive makes both visible.

- **Compare return with collection.**

Record new photographs and readings. Assess condition against the retained collection evidence rather than memory.

- **Explain charges and deductions.**

Use the accepted policy, relevant evidence and documented estimates. Preserve the customer's dispute route.

- **Resolve the deposit or refund.**

Use the wallet refund workflow for wallet funds. For money handled outside KiloDrive, report the actual refund with evidence; a status change alone is not a refund.

- **Keep the timeline and documents.**

Requested, approved, payment confirmed, collection ready, collected, returned, inspected and deposit resolved remain distinguishable.

Actual completed demonstration rental, including return inspection and deposit resolution.

Business benefit: a clearer audit trail for your team and fewer unanswered questions about what was agreed, paid, handed over or returned.

RENTAL RISK AND RESPONSIBLE SCREENING

Protect the fleet. Make informed rental decisions.

KiloDrive's Rental Risk Exchange is the controlled approach to the driver/renter blacklist problem.

A structured risk record can help your team recognize repeated documented incidents, retain knowledge when staff change and make more consistent decisions. Evidence, context and correction rights matter: an allegation, a name match or a disputed bill is not proof of wrongdoing.

Document incidents

Keep the relevant rental, reason, supporting evidence, status and responsible decision together.

Restrict access

Limit viewing and screening to authorized organizations, staff and a permitted rental purpose.

Distinguish findings

Separate unresolved allegations, disputed records, corrections and verified outcomes.

Keep a decision trail

Record who made the rental decision and why. Do not equate a screening match with an automatic rejection.

Support correction

Use response, review and dispute mechanisms so inaccurate or outdated information can be addressed.

Separate activation required

Shared screening is not enabled under the current country review and is not promised as live in this offer. Participation requires approved policy, agreements, appropriate permissions and the configured funding/allowance. Gold alone does not unlock it; cross-border sharing remains separate.

CAPABILITY OVERVIEW

The rental toolkit at a glance.

The strongest benefit is the connection between the customer experience and your operating record.

Discovery & presentation	Vehicle catalogue, branch map, agency details, search/filter/sort, galleries, favorites and visible vehicle specifications.
Fleet & branches	Branch contacts and hours, availability calendars, maintenance blocks, condition details, vehicle documents and inventory allocation.
Policies & requirements	Reusable rental and qualification profiles; duration limits, deposits, late/early return, cancellation, permitted use and additional-driver rules.
Booking & checkout	Current quotes, reservation/booking modes, customer qualification, approval, wallet or recorded external payment, acknowledgement and receipt history.
Custody & exceptions	Collection and return inspections, photos/readings, signed agreements, extensions, supported substitutions with consent, claims and disputes.
People & oversight	Organization team invitations, separate logins, permissions, branch scope, finance access, operational history and available reporting tools.
Customer continuity	Booking status, notifications, retained documents, reviews/reputation where offered, support, account controls and access to other KiloDrive services.
Wider app value	Ride hailing and courier/delivery journeys can introduce customers to rentals in the same app. Qualified loyalty/referral rewards follow their own rules.

Capabilities follow the active country, approved service, listing, permissions and policy. Shared Rental Risk Exchange screening is a separate activation, as explained on page 13. Rental-specific reward earning is not promised.

THE SIX-MONTH PARTNER OFFER

Gold access. Room to use it properly.

A complimentary agency-level offer designed to let your team evaluate real operational value.

6 MONTHS**FREE GOLD****No Gold membership fee.
Unrestricted core rental usage.**

What the partnership offer includes

One named agency

Six consecutive calendar months beginning on the mutually agreed activation date, recorded against the provider organization.

Unrestricted core usage

No plan-imposed numerical caps on core rental listings, branches, staff seats or rental bookings during the sponsored term.

Core Gold rental tools

Fleet, policy and requirement profiles, bookings, team access, supported checkout, handover/return records and available reports.

An orderly start and finish

Agree the activation scope, complete readiness and confirm the sponsored benefit settings before launch. Review continuation before the six months end.

Clear boundaries, no hidden promise

Unrestricted means the core usage caps above are waived; it does not bypass verification, permissions, safety, insurance, lawful-use or storage/security controls. Payment/provider charges and separately approved services such as Risk Exchange are not waived. No paid renewal is authorized by accepting this proposal; any paid continuation needs a separate, clear agreement.

A PRACTICAL PARTNERSHIP PLAN

Start with your fleet. Measure the improvement.

The proposed launch sequence is agreed with your team; it is not a guaranteed implementation timetable.

Discover & configure

Confirm the owner and Jamaica organization, branches, team responsibilities, fleet, qualification rules, rental policies and payment arrangements.

Prove one complete rental

Run a controlled booking through approval, payment record, agreement, collection, return and settlement. Verify who can see and do each task.

Publish & introduce

Make approved vehicles visible; give customers the download/signup guide and train staff on requests, exceptions and returns.

Review the six months

Check adoption and results together, improve the workflow and agree whether to continue before the sponsored term expires.

Success measures worth tracking

Enquiries and booking conversion / Response time / Vehicle utilization

Time spent on handover / Completed inspection records / Refund closure

Customer feedback / Repeat bookings / Staff adoption

Let us show your team one complete rental.

Request a rental-partner demonstration and a six-month Gold activation discussion.

About KiloDrive and its Jamaican roots

Transportation Provider Manual

End User Manual

Build 248 release notes

Partnership enquiries and iOS availability

Screenshots and scope

The phone screens in this proposal are genuine KiloDrive captures retained in the published manuals. They show synthetic demonstration accounts, vehicles and transactions. Build 247 illustrations are used for workflows documented in the build 248 manuals; they do not establish a prospect's price, eligibility, balance or service availability.

Commercial clarity

The six-month offer is an invitation to a sponsored partnership, not evidence that an account has already received an unlimited grant. Before onboarding live customers, KiloDrive and the agency confirm the organization, activation dates and supported benefit settings in writing. No customer count, revenue, utilization uplift, loss prevention or booking volume is guaranteed.

Current availability

Seven-country coverage describes platform configuration, not a claim that every service is open in every location. The Android listing was accessible on 23 October 2026. The configured public iOS link returned unavailable; check with KiloDrive for the approved iPhone distribution route.
